FIDELIS CAPITAL PARTNERS, LLC

Who We Are

Fidelis Capital is an advisor-owned wealth management firm, dedicated to helping very successful people gain more time in their lives to enjoy what's most important to them.

We do this by coordinating, clarifying and simplifying all their financial affairs so they can easily make smart decisions that impact their lives, their organizations, their families and their legacies.

With the drastic changes in the private banking model in recent years, our mission is to revive access to a group of experts and give ultra-high-net-worth families, institutions and other clients the kind of team that can manage all — not just some — of their financial matters, giving them back what money can't buy... time.

Fidelis was founded on a shared passion to deliver a higher level of personalized service and a superior private banking experience by surrounding clients with a diverse team of true specialists.

What We Do

The Fidelis team is comprised of some of the industry's most accomplished and recognized private banking professionals. We designed and developed a suite of effective solutions to manage the financial complexity our clients face.

OUR INVESTMENT PHILOSOPHY

Our approach to investing is guided by a disciplined process and a philosophy informed by over 200 years of experience.

We believe that the only investment results that matter are the ones that are after fees, taxes, or other expenses. We therefore work to reduce those elements by (1) managing some client assets in-house, avoiding third party manager fees, (2) being attentive to tax reduction strategies, and (3) focusing on lower cost solutions.

For most of our clients, risk is as important as return, so we spend even more time seeking out ways to lower a client's risk exposure through negatively correlated assets, asset allocation and option strategies.

Equity (October)

- + Domestic and developed markets equities delivered strong returns in October as data revealing a slowdown gave investors hope for a Fed pause.
- + Clarity around political leadership in Italy and the UK benefited developed market equities after heightened uncertainty in recent months.
- While most emerging markets countries were strong in October, confirmation of President Xi's record third term in China dragged EM down.

Real Asset/Alternatives (October)

- + Positive equity momentum helped REITs as well, which saw a broad-based rally.
- + Commodities and real assets also gained in October, although disparities persisted among constituents of the indices.
